Model 3x Townhome

The Dukes Business Consulting Model 3x Townhome is a smart, net-zero energy urban home with true affordability and contemporary style.

It is an architectural prefab residence that features 3 stories, an elevator, a rooftop terrace, rooftop spa, a european-style kitchen, stainless steel appliances, a built-in smart home system and best of all – integrated solar powering.

Solar powering is architecturally integrated within each Model 3x Townhome as “roof tiles”. The solar panel roof tiles are perfectly laid out where they provide a clean, modern look.

Not only do we market net-zero energy housing, we sell uncompromising style – all at an affordable price point.

The Model 3x Townhome is available in two different models: 3x-1843, a 2 br unit with the added standard feature of a heated sideyard pool and 3x-2068, a 3 br unit with the added standard feature of a downstairs BnB suite.

Open Euro-Style Kitchen

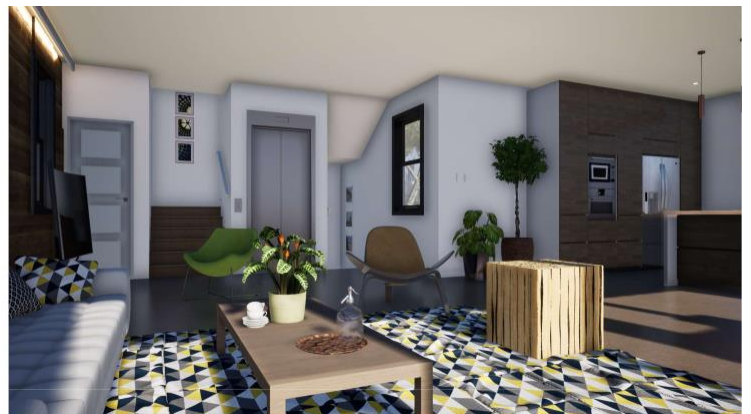

Modern Living Area

Floor-to-Ceiling View Windows

Standard Elevator to All Floors

Spacious Master Bedroom with View

Spa-Style Master Bath

Rooftop Terrace with Standard Architectural Spa

Powerful Solar Roof That's Part of Architecture

Smart Home Equipped

BnB Suite (Model 3x-2068 only)

Standard Heated Side Pool (Model 3x-1843 only)

Unrivaled Contemporary Architecture

Standard Floor Plans

Model 3x-1843 Floor Plan

2 br, 2½ ba with 1,843 s.f. of living area

Model 3x-2068 Floor Plan
